About us

In English, Saha is a Sanskrit word that meaning "together." Saha is a multi-utility DeFi token with a community focus that is part of the growing Saha ecosystem. The SAHA Team's objective is to make Blockchain technology effective, simple, and accessible to the whole world's population. The blockchain, in our opinion, is a response to the consolidation of authority, restoring people autonomy and independence. SAHA was created with the goal of providing maximum utility to not just its community members, but the whole globe. With the cooperation of other nation's governments, a large amount of the money earned will be used to benefit the society through our "WE CARE" Initiative. Our goal is to create at least 1 million employment opportunities in the next three years while enhancing the use of our cryptocurrency and assisting the unemployed. These job openings will be in our Saha headquarters, the Employ Beggars campaign, the Fight Against Pollution Campaign, and, of course, our Sahaverse, which has a goal of creating 10 million jobs in the next five years. All community members and whitelisted accounts will not only make great returns on their investments, but they will also be able to participate in our many campaigns and track their progress.

A lot of information will be available, including how much money was raised, how it was spent, where it was spent, videos, bills, event images, proofs, and much more will be available on the website for the community members to access.

WHY US?

All of the utilities are in the development stages. We have been working on all of the utilities for the past six months to ensure that we can supply all of the utilities as promised. We are pleased to inform that, provided all goes according to plan, all utilities will be available to subscribers by the end of 2023.

World level

Saha is a multi-utility token that was created with the goal of providing maximum usefulness to not only its community, but the whole planet. With the cooperation of other nation's governments, a large amount of the raised and earned money will be used to benefit the society through our "WE CARE" Initiative. Our goal is to create at least 1 million employment opportunities in the next three years while enhancing the use of our cryptocurrency and assisting the unemployed.

Community Level

ALL TRANSACTIONS UNDER THE UTILITIES LISTED BELOW WILL BE DONE WITH SAHA TOKEN, WHICH WILL PLAY AN IMPORTANT ROLE IN THE VALUE OF THE SAHA Cryptocurrency BY HELPING THE COMMUNITY GROW EVERY DAY VIA OUR OPEN SOURCE DECENTRALIZED PLATFORM.

Each trade in the whole Ecosystem performs two simple functions:

1- **LP Acquisition**: 3% is added to liquidity, increasing the coin's stability and allowing the community to gain the best ROI.

2- **Saha Ecosystem Growth Fund**: 2% is added to the Saha Ecosystem Growth Fund to assist the firm expand.

Utilities

All of the utilities are in development stages. We have been working on all of the utilities for the past six months to ensure that we can supply all of the utilities as promised. We are pleased to inform that, provided all goes according to plan, one by one, all utilities will be operational by the end of 2023.

(1) SAHAVERSE

Our STAR project. A location where the sky is no longer a boundary. We've already started building Sahaverse, and trust us when we say that in the near future, Sahaverse will be a place to have fun, relax, travel, read, work, find a job, earn money, visit the moon, Mars, party, business meetings, yoga, Zumba, games, sports, get together, public meetings, and much more. All members of the community will have access to all of Sahaverse's features, however upgrades will always be accessible in the form of nft's, which will be sold on our marketplace. Partners will receive additional features

to help them grow their business and improve customer satisfaction.

P2P transactions are open to everyone.

Tokens and cryptocurrencies are traded.

5% of the SAHAVERSE has been finished.

(2) "WE CARE" Initiative

A Simple initiative by our organisation which will increase the value of Saha crypto, simply by helping the society

Employ Beggars Campaign

Following the initial goal of $100,000, our campaign will focus on delivering a completely furnished 2 bhk rental house with sufficient water and electricity, a job for the father, government school admissions for the children, and a work from home job for the mother to ten families. After thorough personality training, the father will be given a job. These families will be monitored over the following three months, and if they pass the monitoring test, the campaign will go on to the next family.

Fight Pollution campaign

Following the first $100,000 goal, our campaign will begin by forming a team of top-level pollution specialists, instructors, and non-profit organisations. Every three months, an online international level air and water pollution competition

will begin with the assistance of this team and the government of the country. The winners of these competitions will receive money, assistance, coaching, and a marketing platform in exchange for their breakthrough concept. On our website, everyone will be able to see the specifics of the top 10 projects from each competition and anyone can vote, donate, share, or assist these projects, including us, in any way they can.

(3) SAHA Marketplace

Our own nft Marketplace, complete with a user-friendly interface. Once we finish it, our marketplace will be available on Binance Smart Chain, Polygon Chain, and, of course, our own blockchain.

Option for Multiple Chains

Unchangeable record that is transparent

With a few clicks, you can have decentralised authentication

Transaction Fees at Their Lowest

70% of the market place has been constructed

(4) SAHA Travel Advisor

A travel software that allows users to locate the finest restaurants, attractions, accommodations, and weather conditions in real time in any destination on the planet.

Hotels, attractions, and restaurants are all free of charge, and the weather is updated in real time.

The Dapp is 80 percent complete; the only remaining issues are bugs, api issues, and design.

(5) SMART CONTRACTS

Using our tool, you may create smart contracts and validate them without the need for third parties. Using SAHA blockchain technology, you may achieve freedom and autonomy!

Make new business in a secure manner

Consolidate agreements

Encryption using many layers

Security at the highest level

20% of the Dapp has been finished

(6) SAHA Wallet

A secure cryptocurrency wallet that is connected to our own blockchain. Add SAHA credits as soon as possible! You may shop in both physical and digital stores with confidence thanks to our robust security system.

SAHAVERSE will be a great place to shop

Special discounts will be available

SAHA Wallet will allows you to keep track of your expenditures

The wallet Dapp has been developed to 70%

(7) SAHA BlockChain

Our Own Open Source BlockChain, which will be available for any developers to test or upload their apps with the lowest transaction costs and the highest level of security.

Your consumers' loyalty

Boost your profits

The cheapest transactions

On the test server, we've already implemented our "proof of work" algorithm blockchain for testing and learning reasons. We have no plans to use a "proof of work" algorithm blockchain since it leaves a lot of carbon traces. So, right now, we're experimenting with the "Proof of Stake" and "Proof of History" algorithms to determine which one works best for us.

Any of the above-mentioned blockchains can be deployed in the next 45 days, but we need additional time to try and error these blockchains with something fresh. As a result, the blockchain deployment might take up to 6 months.

(8) SAHA Exchange

Enjoy the industry's lowest transaction fees! An Exchange that is contemporary, low-cost, and modular. Our Exchange will allow you to receive and send cryptocurrency.

Cryptocurrency deposits and withdrawals

Rates at a minimum

Transactions will be completed quickly

Monthly tax-free terminal

The exchange Dapp has now finished 65 percent of its work. We just require more time, money, and resources to build our exchange, since installing an exchange necessitates a great deal of government approval and legal work.

TOKENOMICS

Altogether, 10.2 Billion tokens will be distributed in the token lifetime by SAHA. There will be no creation of new tokens from SAHA in the future and those 10.2 billion tokens will be the only tokens used in transactions.

A part of these Tokens will be offered in partnerships consolidation processes, bonus for development team, founder's share, for the company cashier for future Investments, community award on social networks, marketing, Adding a percentage of 79%.

The other 21% will be available for the fundraising process via Presale, Sale & ICO.

The amount that will be collected in the ICO process will be used to expand the development team, legal adjustments of acquiring of financial processes, structuring of Departments of financial and accounting management, support and attendance, legal department, server infrastructure and marketing.

For this, we always seek a solid and lean structure, but cherishing the quality of the team, planning, equipment and installations to escalate the activities.

Crypto Allocation:

Total Supply : 10.2 Billion

Founder and Investors : 2.4 billion

"WE CARE" Initiative : 2.0 billion

Team and Development : 2.0 billion

Liquidity : 2.1 billion

Marketing : 2.5 billion

Rewards : 1.2 billion

Roadmap

PHASE 1 Q1

-Launch of Website

-Fb page,

-Instagram page

-Twitter Page

-Discord Channel

-YouTube Channel

PHASE 1 Q1

-Marketing Buzz Campaign for Presale (Block 1)

-Min. target of 25 youtubers creating 75 videos for marketing

-Daily posts of engagement on all the social media platforms
